

# Preparing Foundation Doctors for Acute Immediate Care

**Dr. Gareth SD Morrison**  
Consultant in Anaesthetics / ICM

Knowledge of aspects of acute care in trainee doctors

Confidential inquiry into quality of care before admission to intensive care

The transition from medical student to junior doctor: today's experiences of Tomorrow's Doctors

The preparedness of UK graduates in acute care: a systematic literature review

General  
Medical  
Council

Be prepared:  
are new doctors safe to practise?

Working with doctors Working for patients

## How prepared are medical graduates to begin practice?

Acute Immediate Care Medicine for Foundation Doctors

Fifth Edition

Dr Gareth SD Morrison

**Module 1:** Early warning scores and the identification of the 'at risk patient'

**Module 2:** Assessment of the 'acutely unwell patient'

**Module 3:** Airway and oxygenation

**Module 4:** Respiratory failure and ventilation

**Module 5:** Circulatory failure

**Module 6:** Acute Kidney Injury

**Module 7:** Neurological failure

**Module 8:** Acute pain management

**Module 9:** Sepsis

**Module 10:** Equipment and practical skills

**Module 11:** Clinical communication

# Module 3 Airway and Oxygenation

## Airway and Oxygenation Learning Outcomes

By completing this Module, the learner:

Learning outcome	Tick when read	Tick when understood
Describes the signs of airway obstruction	<input type="checkbox"/>	<input type="checkbox"/>
Demonstrates safe use of simple airway manoeuvres / adjuncts (head-tilt, chin lift, suction, oropharyngeal, nasopharyngeal airway)	<input type="checkbox"/>	<input type="checkbox"/>
Describes the indications and rationale for safe oxygen therapy in the critically ill patient	<input type="checkbox"/>	<input type="checkbox"/>
Demonstrates safe and effective use of laryngeal mask airway	<input type="checkbox"/>	<input type="checkbox"/>
Demonstrates basic treatment for simulated choking	<input type="checkbox"/>	<input type="checkbox"/>
Describes the indications for and method of needle cricothyroidotomy	<input type="checkbox"/>	<input type="checkbox"/>
Describes the indications for and method of surgical cricothyroidotomy	<input type="checkbox"/>	<input type="checkbox"/>
Demonstrates safe and effective management of patients with tracheostomies.	<input type="checkbox"/>	<input type="checkbox"/>

# ACCA Skills Stations (1 hour each)

Airway and oxygenation

Respiratory failure

Circulatory failure

Neurological failure

Sepsis

Acute Kidney Injury

## ACUTE CARE COURSE FOR ADULTS (ACCA<sup>®</sup>) EXAMINATION RESULTS

### MULTIPLE CHOICE (MCQ) EXAMINATION

Candidate name:	Dr. XXXXXXXX
Your MCQ Examination mark:	90%
Course average:	79.04%
Highest mark	92%
Lowest mark	64%
Position:	2 <sup>nd</sup> = / 100
Outcome [PASS / BORDERLINE / FAIL]:	<b>PASS [Outstanding]</b>
Pass rate	86%
KR 20*:	0.89 (Excellent reliability)
Pass mark:	Pass mark set by modified Angoff Method = 78% PM – 1 SEM (to ensure validity) 78 – 3.5 = 74.5 (rounded up to 75%)

Question no. and topic examined	Your mark / 5	Pass mark set by examiners / 5	Group Average Mark / 5	Difficulty index **P Value
Q1: Airway (S)	5	4.15	3.8	0.76
Q2: Airway (M)	5	4.2	4	0.8
Q3: Breathing (S)	4	4.1	3.8	0.76
Q4: Breathing (M)	4	3.8	3.4	0.67
Q5: Circulation (S)	5	4.6	4.3	0.86
Q6: Circulation (M)	5	4.4	4.7	0.94
Q7: Circulation (M)	4	3.8	3.7	0.74
Q8: Renal (S)	5	4.35	4.4	0.88
Q9: Renal (M)	4	3.7	3.7	0.75
Q10: Neuro (S)	5	3.95	4.1	0.83
Q11: Neuro (M)	3	4.45	4.1	0.83
Q12: Anaphylaxis (S/M)	5	3.85	4.4	0.88
Q13: Sepsis (S)	5	3.4	2.4	0.49
Q14: Sepsis (M)	4	3.75	3.3	0.7
Q15: Drugs (S/M)	4	3.8	3.8	0.75
Q16: Monitoring (S/M)	5	4.5	4.3	0.86
Q17: Pain (S)	5	3.9	4.5	0.9
Q18: Pain (M)	5	4.1	4.7	0.93
Q19: Drugs (S/M)	5	3.6	4	0.8
Q20: Equipment (S/M)	5	3.6	3.4	0.69

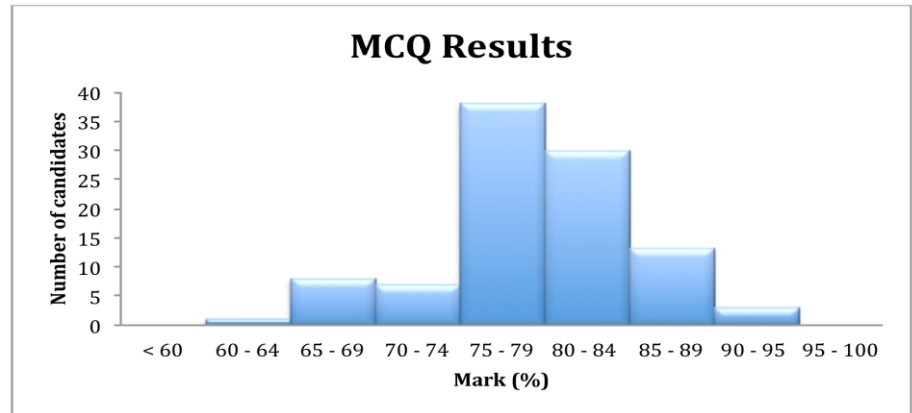

(S): Question assessing basic science knowledge

(M): Question assessing clinical application / management

(S/M): Question assessing both basic science and clinical application

\* **KR 20** is a coefficient of reliability. It will generally increase as the intercorrelations among test items increase, and is thus known as an internal consistency estimate of reliability of test scores. Values > 0.8 are considered excellent.

\* **P Value** = the percentage of the total proportion of marks achieved for a given question by the whole group. Values ≥0.9 suggest an easy question. Values between ≥0.7 ≤0.9 suggest a suitable standard question, which will differentiate candidates. A P value ≥0.3 ≤0.7 suggest a difficult question. If a value ≤0.1 is obtained, the question is removed from the total score.

A bar chart illustrating the spread of marks obtained by BHSCT candidates

### OBJECTIVE STRUCTURED CLINICAL EXAMINATION (OSCE)

Your mark (out of 20)	19
Group average (out of 20)	16.7
Group highest mark	20
Group lowest mark	11
Position	8 <sup>th</sup> = / 100
Outcome [PASS / BORDERLINE / FAIL]	<b>PASS [excellent]</b>
Examiner's comments:	
[GM] Excellent systematic assessment. Very impressed with CXR interpretation. Was the only candidate who checked patency of PCA – excellent. Very safe and competent approach.	

### OVERALL OUTCOME FOR THE ACUTE CARE COURSE FOR ADULTS

**PASS (Certificate of Successful Completion Awarded)**

If you wish to discuss any of your results, please contact Dr. G. Morrison ([gsmorrison@doctors.org.uk](mailto:gsmorrison@doctors.org.uk)), who is happy to go over the examination with you.

Thank You
